## Work Experience

### National Renewable Energy Laboratory (NREL)

Software Development Intern | *Python, Docker, MongoDB, Git, AWS (ECR, Cloudwatch, Inspector)*

Golden, Colorado

08/2023 – 07/2024

- Refined data processing in model build and analysis pipeline, transforming raw data into inferred values with comprehensive manual and automated testing.
- Optimized system scalability through time complexity improvements, enhancing overall performance.
- Troubleshoot and resolved model build pipeline failures in staging and production environments using CloudWatch logs.
- Streamlined and automated DevOps processes by restructuring CI/CD workflows with GitHub Actions.
- Implementing data export/import functionality for timeseries data purge and restore, improving database efficiency and data lifecycle management.

### Oracle Financial Services Software

Associate Technical Consultant | *PL/SQL, XML, Oracle DB, Oracle OFSAA, WinSCP, ETL*

Bangalore, India

07/2021 – 05/2022

- Implemented OFSAA LLFP fintech solutions in SIT, UAT and provided post-implementation support in Production environments for 2 international financial banking firms.
- Engineered 6 GUI based workflow runs for ETL pipelines with numerous tasks and integrated them with backend scripts to process data from Pre-staging to end-user report generation stage.
- Enhanced UI for Individual Assessment (IA) module based on XML Forms Framework by customizing 4 UI Forms and 8 PL/SQL scripts to process over 300k customer records by proposing to debug existing legacy code.
- Generated PL/SQL scripts for data manipulation and validation to automate manual tasks for filtering source data that helped reduce execution times by 20% while generating end-user reports containing customer data for over 6 months.
- Documented technical designs and deployed code packages across environments via WinSCP/PuTTY client-server apps.

## Technical Skills

**Languages:** Python, C++, Java, HTML, CSS, JavaScript, TypeScript, PL/SQL

**Frameworks:** REST API, Node.js, Express, React, Next.js, Flask

**Databases:** PostgreSQL, MongoDB, Oracle DB, AWS DynamoDB, Supabase

**Generative AI:** Anthropic, OpenAI, Groq, Streamlit, LangChain, MultiOn, RAG Chain, LLMs, Deepgram

**Cloud Platforms:** OpenStack, AWS Cloud Services (EC2, S3, SQS, Lambda, Cloudwatch, ECR)

**DevOps:** Docker, GitHub, GitHub Actions

**Developer Tools:** Git, Linux, Bash, VSCode, Postman, Figma, Documentation, Agile

## Projects

**Voice AI Interviewer Agent** | *TypeScript, NextJS, Vapi, Supabase, Groq, GenAI, ShadCN UI*

06/2024 – 06/2024

- Engineered an AI-powered voice interviewer, leveraging Groq for fast inference and Vapi for voice interactions.
- Implemented evaluation system with custom metrics, utilizing Supabase for authentication and storage.

**Easy ApplAI Auto Job Applications** | *Python, MultiOn, AgentOps, Groq, Wordware, Deepgram*

07/2024 – 07/2024

- Voice AI agent for automatically applying to jobs using Simplify for auto-fill and MultiOn for browser automation.
- Utilized Groq's function calling tools voice-to-code interaction and Wordware for publishing custom ElevenLabs API.

**YouTube Conversation Chatbot** | *Python, MongoDB, Streamlit, Deepgram, Together.ai, LLM*

06/2024 – 06/2024

- Built video search with Generative AI RAG chain, audio transcription, vector embedding, MongoDB vector search.
- Developed responsive Streamlit frontend integrating LLMs to query embedded video data and retrieve relevant info.

**Product Data Catalog Web App** | *React.js, Next.js, Express.js, PostgreSQL, Node.js, TypeScript*

06/2024 – 06/2024

- Developed a full-stack web app using Next.js and Express.js, implementing CRUD operations with user authentication.
- Leveraged TypeScript for development and Vercel and Heroku for deployment for reliability, maintainability, scalability.

**Cloud-based Video Face Recognition App** | *AWS, Python, Flask, Docker, OpenStack*

02/2023 – 04/2023

- Designed a 3-tier hybrid cloud architecture leveraging AWS and OpenStack for Web, App, and Data tiers integration.
- Prepared Python scripts for: Lambda triggers, S3, DynamoDB; auto-scaled 20 EC2 instances via SQS and Cloudwatch.

## Education

**Arizona State University**

Masters in Computer Science | **GPA: 3.90 / 4.0**

Tempe, Arizona

08/2022 – 05/2024

Software Courses (Requirements; Design; Verification, Validation, Testing), Data Processing at Scale, Cloud Computing

**National Institute of Technology Hamirpur**

Bachelors in Electronics and Communication | **GPA: 8.73 / 10**

Hamirpur (H.P.), India

08/2017 – 05/2021

## Extracurriculars

**AICamp Generative AI Hackathon for AI Agent and RAG** | *Overall Winner*

06/2024 – 06/2024

- Won the AWS for Startups prize for creating a multimodal AI assistant that automates browser tasks on behalf of users.

**Coding Experiences: Debugging Made Easier** | *Blog Website*

10/2021 – 06/2024

- Maintaining blog with posts - "Adding Local Directory to GitHub Repository" and "Renaming Multiple Files At Once".
