Work Experience

National Renewable Energy Laboratory (NREL)   **Golden, Colorado**
Software Development Engineer | *Python, Docker, MongoDB, Git, AWS (ECR, Cloudwatch, Inspector)*   **08/2023 – 10/2024**

- Refined data processing in model build and analysis pipeline, transforming raw data into inferred values with comprehensive automated unit and integration testing.
- Optimized system scalability through time complexity improvements, enhancing overall performance.
- Troubleshot and resolved model build pipeline failures in staging and production environments using CloudWatch logs.
- Streamlined and automated DevOps processes by restructuring CI/CD workflows with GitHub Actions.
- Implementing data export/import functionality for timeseries data purge and restore, improving database efficiency and data lifecycle management.

Oracle Financial Services Software   **Bangalore, India**
Software Development Engineer | *PL/SQL, XML, Oracle DB, Oracle OFSAA, ETL*   **07/2021 – 05/2022**

- Implemented OFSAA LLFP fintech solutions in SIT, UAT and provided post-implementation support in Production environments for 2 international financial banking firms.
- Engineered 6 GUI based workflow runs for ETL pipelines with numerous tasks and integrated them with backend scripts to process data from Pre-staging to end-user report generation stage.
- Enhanced UI for Individual Assessment (IA) module based on XML Forms Framework by customizing 4 UI Forms and 8 PL/SQL scripts to process over 300k customer records by proposing to debug existing legacy code.
- Generated PL/SQL scripts for data manipulation and validation to automate manual tasks for filtering source data that helped reduce execution times by 20% while generating end-user reports containing customer data for over 6 months.
- Documented technical designs and deployed code packages across environments via WinSCP/PuTTY client-server apps.

Technical Skills

Languages: Python, C++, Java, JavaScript, TypeScript, PL/SQL, Go, YAML
Frameworks: REST API, Node.js, Express, React, Next.js, Flask, FastAPI
Databases: PostgreSQL, MongoDB, Oracle DB, AWS DynamoDB, Supabase
Generative AI: Meta Llama, Anthropic, OpenAI, RAG Chain, LLMs
Cloud Platforms: OpenStack, AWS (EC2, S3, SQS, Lambda, Cloudwatch, ECR)
DevOps: Docker, GitHub, GitHub Actions, Kubernetes
Developer Tools: Git, Linux, Bash, VSCode, Postman, Figma

Projects

Bookwise: Second Brain for Readers | *Python, FastAPI, Supabase, TypeScript, NextJS, SwiftUI*   **10/2024 – 10/2024**

- Architected a full-stack document processing pipeline enabling readers to capture and explore reading insights.
- Utilized LLMs to enhance information organization and retrieval using knowledge graphs, word clouds.

Microservices Video to MP3 Converter | *Python, Docker, Kubernetes, RabbitMQ, MongoDB*   **09/2024 – 09/2024**

- Engineered a distributed system for converting video files to MP3 format using microservices architecture.
- Implemented secure JWT user authentication, message queuing with RabbitMQ, scalable storage, notifications.

Voice AI Interviewer Agent | *TypeScript, NextJS, Vapi, Supabase, Groq, GenAI, ShadCN UI*   **07/2024 – 07/2024**

- Engineered an AI-powered voice interviewer, leveraging Groq for fast inference and Vapi for voice interactions.
- Implemented evaluation system with custom metrics, utilizing Supabase for authentication and storage.

YouTube Conversation Chatbot | *Python, MongoDB, Streamlit, Deepgram, Together.ai*   **06/2024 – 06/2024**

- Built video search with Generative AI RAG chain, audio transcription, vector embedding, MongoDB vector search.
- Developed responsive Streamlit frontend integrating LLMs to query embedded video data and retrieve relevant info.

Cloud-based Video Face Recognition App | *AWS, Python, Flask, Docker, OpenStack*   **02/2023 – 04/2023**

- Designed a 3-tier hybrid cloud architecture leveraging AWS and OpenStack for Web, App, and Data tiers integration.
- Prepared Python scripts for: Lambda triggers, S3, DynamoDB; auto-scaled 20 EC2 instances via SQS and Cloudwatch.

Education

Arizona State University   **Tempe, Arizona**
Masters in Computer Science | **GPA: 3.90 / 4.0**   **08/2022 – 05/2024**
National Institute of Technology Hamirpur   **Hamirpur (H.P.) , India**
Bachelors in Electronics and Communication | **GPA: 8.73 / 10**   **08/2017 – 05/2021**

Extracurriculars

UC Berkeley Journalism AI/Journalism Hackathon | *Overall Winner*   **10/2024 – 10/2024**

- Finished in the top three teams for developing documentary film making toolkit alongside media professionals.

AICamp Generative AI Hackathon for AI Agent and RAG | *Overall Winner*   **06/2024 – 06/2024**

- Won the AWS for Startups prize for creating a multimodal AI assistant that automates browser tasks on behalf of users.
